Blue Cord Safety, LLC is a Boot Strapped  
company with no past performance.

## **Blue Cord Safety, LLC**

**Integration of Multi-Domain Operations into military training exercises at the tactical, operational and strategic levels. Capabilities include:**

- Cyber
- Space
- Electronic Warfare
- MILDEC

Our Small team of SMEs augment your exercise staff to design exercises and develop MSEL injects to achieve training objectives. We develop front end products as well as exercise injects that integrate cyber, space, electronic war fare and non-kinetic effects. If required, Blue Cord Safety can augment staffs for operations or Exercise White Cell / EXCON. We have relationships coordinate authorities for Open Air EW and employ emitters for Signals of Interest.

### **Significant Experience/Resume:**

5 years as a Collective Training Exercise Integrator supporting Military Intelligence Unit Exercise design, development and execution to include producing the orders, annexes and front end products and daily injects.

2 years at AFCYBER G33 Orders Management

8 years working Sensitive Activities (C-IED) primarily supporting MRXs at the division, MEF and CJSOTF Level.

Cyber and STO Cell at USCENTCOM for planning and execution of the 2003 Operation Iraqi Freedom (1003v).

### **Differentiators**

- + Ability to obtain FCC Authorities for Open Air EW; Have access to emitters for Signals of Interest.
- + Flexible Solutions for Difficult Problems to include short term augmentation for exercise design and execution.
- + SMEs who have successfully integrated these capabilities in combat operations and exercises.
- + Ability to facilitate short focused advanced courses or support pre-exercise academic phase.

### **Open to Sub-Contracting Opportunities.**

**Company Ethos and Culture:** Based on the Veterans' Creed
